Full-Stack Software Developer building scalable, production-ready web applications with React, Next.js, TypeScript, PostgreSQL, and Supabase. Strong in frontend architecture, component design, and UI/UX, with a focus on clean, performant interfaces and thoughtful user flows. Solid backend experience designing and shipping RESTful APIs, data models, and database-driven features—from auth and CRUD to real-time updates and deployment-ready systems.

Skills

- TypeScript
- JavaScript
- React.js
- Next.js
- Node.js
- Express
- PostgreSQL
- Supabase
- Zustand
- Jest
- WordPress
- Git

Professional Experience
